

About Bartelt Packaging

Bartelt is a trusted manufacturer of pouching, cartoning, shrink wrapping, over wrapping, and case and tray packing systems, providing dependable and long-lasting solutions to food and non-food industries. Bartelt also operates as the master distributor for both FLtècnics' rollstock and pre-made pouch and Cetec Industrie large bag format packaging machines. As the world's first developer of intermittent motion horizontal form fill seal pouching machines, Bartelt is a true pioneer in automated packaging. From simple to advanced applications spanning primary and secondary packaging, quality components and a durable design are incorporated into every solution. Bartelt is a product brand of ProMach, a global leader in packaging line solutions. As part of the ProMach Flexibles & Trays business line, Bartelt helps our packaging customers protect their products and earn the trust of their consumers. ProMach is performance, and the proof is in every package. Learn more about Bartelt at www.BarteltPackaging.com and more about ProMach at www.ProMachBuilt.com

## HORIZONTAL FORM/FILL /SEAL

### Bartelt IM Focus Pouching Machine

The Bartelt® IM Focus is a high-quality poucher designed specifically to meet the needs of the single-serve market. The simplicity of operation and pre-programmed recipe settings make it an excellent choice.

*An excellent choice for single-serve pouch applications at rates up to 100 cycles per minute.*

#### FEATURES & BENEFITS

- Optimized for the single-serve market
- Easy to maintain and operate
- Single bag clamps
  - maximizes pouch opening for filling
- Two fill stations
- Superior seal quality
- Available in left and right hand configurations
- Single-sided operation provides complete operator access
- Excellent value solution for your packaging needs
- Easy to upgrade

#### OPTIONS

- Pouch opening features- tear slit, diamond notch
- Hanger hole—Round or Sombrero – 360° or 270°
- Pouch coding – emboss, inkjet, laser, thermal transfer
- Seal pre-heat and cooling assemblies
- Product settling devices
- Dust control and top seal cleaning
- Gas flushing
- Pouch stretching and deflating
- Integration of auxiliary equipment: automatic web splicer, desiccant feeders, and vision systems
- Integration of various product fillers and scales, labelers, or checkweigher
- Integration of funnel conveyors to increase output
- Servo-driven seal driver system
